IMPORT STATISTICS
WILLIAM C. GEORGE

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, metals, such as copper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawals for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to the Bureau of the Census.

"Effective with the statistics for the month of January 1948, United States Imports for Consumption is shown in Report FT 110. The monthly issues of Report FT 110 for 1947 contained information on general imports and the calendar year issue of Report FT 110 contained information on both imports for consumption and general imports."

IMPORT STATISTICS
WILLIAM C. GEORGE

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, metals, such as copper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawals for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to the Bureau of the Census.

IMPORT STATISTICS
WILLIAM C. GEORGE

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, metals, such as copper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawals for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to the Bureau of the Census.

IMPORT STATISTICS
WILLIAM C. GEORGE

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, metals, such as copper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawals for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to the Bureau of the Census.

COMMODITY DESCRIPTION AND UNIT OF QUANTITY — SCHEDULE A NUMBER.	COUNTRY OF ORIGIN	NET QUANTITY	VALUE (DOLLARS)

1/ From information available at the time the statistics were compiled, it appears that some of the items included in these Schedule A commodity codes will have to be reclassified into new Schedule A commodity classifications which will be required under the Presidential Proclamation putting into effect as of April 21, 1948, provisions of the General Agreement on Tariffs and Trade with respect to Czechoslovakia.

As soon as it is possible to set up and secure the necessary approval of these new classifications, the imports shown in the present Schedule A commodity codes will be recoded into the new classifications. At that time revised information will be made available.

2/ The items included in these Schedule A commodity codes may have to be reclassified into new Schedule A commodity codes as a result of both the Presidential Proclamations putting various provisions of the General Agreement on Tariffs and Trade into effect as of January 1, 1948, and the Presidential Proclamation putting into effect as of April 21, 1948, provisions of the General Agreement and Trade with respect to Czechoslovakia. Work on new classifications for these Schedule A commodity codes has been started and revised information will be made available as soon as it is possible to complete the work on these new classifications.

IMPORT STATISTICS
WILLIAM C. GEORGE

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, metals, such as copper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawals for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to the Bureau of the Census.

COMMODITY DESCRIPTION AND UNIT OF QUANTITY SCHEDULE A NUMBER.	COUNTRY OF ORIGIN	NET QUANTITY	VALUE (DOLLARS)

1/ From information available at the time the statistics were compiled, it appears that some of the items included in these Schedule A commodity codes will have to be reclassified into new Schedule A commodity classifications which will be required under the Presidential Proclamation putting into effect as of May 22, 1948, provisions of the General Agreement on Tariffs and Trade with respect to China.

As soon as it is possible to set up and secure the necessary approval of these new classifications, the imports shown in the present Schedule A commodity codes will be recoded into the new classifications. At that time revised information will be made available.

2/ The items included in these Schedule A commodity codes may have to be reclassified into new Schedule A commodity codes as a result of both the Presidential Proclamations putting various provisions of the General Agreement on Tariffs and Trade into effect as of January 1, 1948, and the Presidential Proclamation putting into effect as of April 21, 1948, provisions of the General Agreement on Tariffs and Trade with respect to Czechoslovakia. Work on new classifications for these Schedule A commodity codes has been started and revised information will be made available as soon as it is possible to complete the work on these new classifications.

IMPORT STATISTICS
WILLIAM C. GEORGE

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, metals, such as copper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse sithdrawals for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transaction for that commodity or country.

Price: Annual subscription (including annual and monthly issues).....$3.00
Monthly and annual issues, each..... 0.25

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Washington 25, D.C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to the Bureau of the Census.
